AS EASY AS AIS GETS

Customers love the award winning features that have been designed to make AIS WatchMate the easiest device to use on your boat.

These features include:

- Alarm configuration and Filtering,
- Listing of vessels by target priority,
- Multiple profiles based on location,
- Plot future crossing positions,
- Anchor Watch to monitor anchor drag,
- Low power consumption,
- Displays GPS status, position, course and speed,
- and of course WatchMate is a dedicated AIS safety instrument independent of all other equipment.

WatchMate has been designed to simplify the display of other ships AIS location and course information. As required WatchMate filters out non priority targets and only displays the vessels that may be on a collision course, removing the uncertainty and stress related to navigating in highly congested and isolated waterways.

The WatchMate installation is designed to be easy, with multiple mounting options and IPx7 rated water proofing.
